};
```

WORK EXPERIENCE

Front-end Developer

-

[Mudah.my](#)

Dec 2021 – current

Malaysia (remote)

This product is an online marketplace to buy and sell a variety of products and services in Malaysia. (It's a sister site with Chotot.vn)

- Work in frontend team, delivery new features for the system.
- Optimize the performance of the website
- Write the unit tests (using Jest/Testing Library) and E2E tests (using Cypress).

NodeJs/ReactJS Software Developer

-

[Cloudwaitress.com](#)

Oct 2020 – Nov 2021

Australia (remote)

This product is an online ordering & reservation system for restaurants. It allows restaurant owners around the world to create their own websites and start accepting orders and reservations.

- Work in both frontend website using ReactJs, and also the NodeJs API server in the backend to implement the new features for the system based on the customer's requirement
- Build/Optimize UI components with/without pre-defined designs.
- Integrate with third-party services for handling payments, deliveries, billing subscriptions, etc

NodeJs/VueJs Self-Taught Developer

-

[Tourino](#)

July 2019 – Sep 2020

Self-study stuff

This personal project is a Travel Agency Website powered by NodeJS, ExpressJS, MongoDB and VueJS.

- Fetch and show tours with paginations from Backend API.
- Filter/sort tours with multi-options & sync the Sort and filter selections with URL.
- Authentication & Authorization (Log in, sign up, reset the password.)
